EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Claim 3, line 3: change "or less to" to - - or less to the - -

Allowable Subject Matter

2. Claims 1-6 are allowed.

3. The following is an examiner's statement of reasons for allowance: The prior art of record and to the examiner's knowledge does not teach or render obvious, at least to the skilled artisan, the instant invention regarding a method of producing an electrolytic capacitor, particularly characterized in claim 1 by a series of steps of letting the capacitor stand at temperature of 225 to 305°C and then a voltage applying (aging) treatment, sequentially repeated twice or more after the step of molding with resin and curing. Claims 2-6 depend on claim 1.

Art Unit: 2812

4. The closest prior art of record is Yasuhiro et al. (JP 2000-340466) which discloses a method of forming an electrolytic capacitor with two sequential aging treatments but does not disclose a step of letting the capacitor stand at a temperature of 225 to 305°C either before the first or in between the first and second aging treatments.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
